

Technology

Versatile from any lie

Technology
New POWER TRENCH design results in more distance

Technology
Design to reduce digging

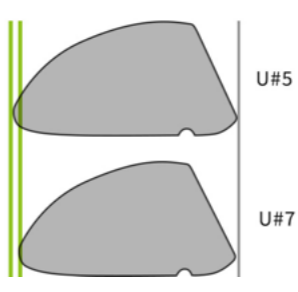

Minimize fat shots thanks to a rounder leading edge.

Technology
Design by number

U6, U7 heads are narrower
The shape compliments the irons for a smooth transition between shots

Technology
DAIWA CARBON TECHNOLOGY SHAFT exclusively for LADY

Exclusively designed for LADY to make golf easier
Improved impact consistency equals more overall distance

Technology
Coaching grip allows you to make the same grip for every shot

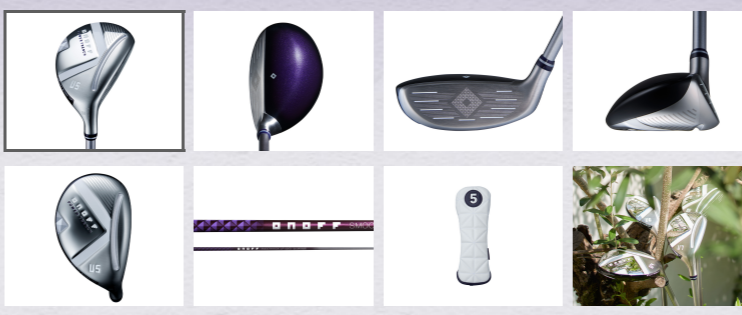

By aligning your thumb with the grip pattern, you can easily make the same grip every shot
hold the club with confidence and swing for more consistent shots

Design

A new Diamond pattern exudes a sophisticated design and style for LADY.

Choose your own color,
Color Custom for LADY.

ONOFF Color Custom allows you to create your own unique set of LADY clubs. Choose from 4 different shaft colors and 3 different grip colors to match our style. Weight colors and iron badges can also be customized from 3 different colors. Be different and stand out from the crowd with ONOFF Color Custom. Find your favorite combination in our Color Simulator.

Spec

ONOFF UTILITY WINGS LADY

- The reversed arch of the new POWER TRENCH creates a bigger sweet spot. Compared to the previous model, ball speeds are up, even on miss hits meaning more distance than ever for a utility.
- A rounder leading edge minimizes digging and produces better impact in any lie. Better impact equals more distance.
- The face height is kept constant through all lofts resulting in more consistent impact from any lie.
- The shape of the utility compliments the irons meaning a smooth transition between shots for more stability and consistency.
- Exclusively made for LADY shaft featuring DAIWA CARBON TECHNOLOGY. A light weight easy to swing shaft that is still stable and accurate. More distance, straighter shots.
